## PROJECTS

### Restaurant Management System

This project is an online Restaurant website where the customers can book the table in advance. Along with the table they can even book the food and parking too and it also provides jobs for the workers in the restaurant.

### Online Admission System

This project is an online college website where the students have to attempt an exam in order to get admission.If the student has qualified in the exam he has to upload the necessary certificates. The faculty will prepare the question paper for a specific course and admin will update the information regarding the college on the website.

### Integrated Hostel Management System

This project is an online website where the customers can book the hostel rooms in advance.If the customer is about to stay in the hostel for more than one year then he can even customize his/her room.The designers provide the designs for their rooms.
